OVER 90% RECYCLED MATERIAL CONTENT IN OUR STAINLESS STEEL BODY.

Sustainable, recyclable, long-lasting and resource-efficient stainless steel because we are working towards a world that lasts forever.

The highest-recycled material content rate in the industry of over 90%. This significantly reduces the need to extract new minerals and ores from the ground and minimises the environmental impact of our production processes.

The recycled stainless steel not only helps save the world's resources, it is also the most durable material for cookware. Stainless steel is known for being very resistant to heavy use, cleaning and can withstand high heat. The fact that we now use recycled stainless steel does not compromise the performances of this highly durable material.
