

# ORIGINAL PAINT & VARNISH REMOVER

Nitromors Original Paint & Varnish Remover is ideal for those vertical applications due to its strong non-drip gel formula. The gel is also a lovely shade of green meaning you are able to see exactly where you applied it. There aren't many solutions that Nitromors Original Paint & Varnish Remover can't defeat.

## HOW TO USE

1. Pour into a suitable glass or metallic container, and replace screw cap immediately. Apply a thick coat with a dabbing action (2-3mm). Do not brush out.
2. Once paint has blistered (5-10 mins) apply second coat, working into the blistered paint. Do not attempt to remove paint. Leave up to 40 minutes. If dried out re-apply.
3. Remove blistered and softened paint with a scraper or shavehook. In difficult areas use an old nylon toothbrush. Repeat if necessary. **Expert Tip:** for intergrated paint, rub with wire wool dipped in Nitromors to achieve a really clean finish!

**Top Tips:** Wash off with detergent in cold water and a nylon scourer or use white spirit and wire wool to avoid raising the grain on fine or laminated woods, Allow to dry thoroughly and rub down with fine sandpaper or wire wool prior to refinishing.

**Cleaning up:** Collect waste in newspaper, leave outside in safe place until dry. Dispose of in a dustbin. Clean tools etc. in warm soapy water and avoid contact with plastic sinks or baths.

■ Appearance	Green Viscous gel.
■ Specific Gravity	0.850 to 0.950
■ Viscosity	3000 to 5000 cps
■ Active Content % m/m	70 to 100
■ Flammability	Highly flammable liquid.
■ Composition Data	Thickened blend of acetals and hydrocarbon solvents with surfactant, activator, paraffin wax evaporation retardant, corrosion inhibitor and green dye.
